

Login Page - User Flow

1. User Arrives:

- User opens the app and lands directly on the Login Page.

2. User Chooses Login Method:

- The user sees options for Email/Password, Google, Spotify, and Guest (during Beta).

3. Flow Option A: Email/Password Login

- User taps into the "Email or Username" field and types their input.
- User taps into the "Password" field and types their password. (Option to toggle visibility).
- User taps the "LOG IN" button.
- **Success:** User is authenticated and navigated to the main landing page (or Welcome Page if first time).
- **Failure (Invalid Credentials):** A clear error message appears (e.g., "Incorrect username or password."). User stays on Login Page.
- **Failure (Input Validation):** Inline error appears near the field if input is invalid *before* submitting.

4. Flow Option B: Social Login (Google/Spotify)

- User taps the "Login with Google" or "Login with Spotify" button.
- User is briefly redirected to the Google/Spotify authentication screen.
- User authenticates with the chosen service.
- **Success:** User returns to the app, logged in, and navigated to the main landing page (or Welcome Page).
- **Failure (User Cancels/Auth Fails):** User returns to the Login Page. A subtle error message might appear.

5. Flow Option C: Guest Login (During Beta)

- User taps the "Continue as Guest" link/button.
- **Success:** User is navigated to the main landing page with guest permissions. (Notification about limitations might appear).

6. Navigation Option: Sign Up

- User taps the "Sign Up" link.
- User is navigated to the Sign Up page.

7. Navigation Option: Forgot Password

- User taps the "Forgot Password?" link.
- User is navigated to the start of the Password Reset flow.

Note: This document describes the app's functionality from the user's perspective.
