

1. Entry Point

1.1. Arrival:

- User arrives on this screen after:
 - A successful login (for returning users).
 - Completing the "First Time Welcome / Onboarding Screen" (for new users).

1.2. Initial State:

- The specific layout, content, and available actions presented depend heavily on the user's established account type: **Listener**, **DJ**, or **Venue**.

2. Common Elements (Likely Visible to All User Types or on Multiple Pages)

2.1. Navigation Bar / Header:

- **App Logo/Name:** Typically top-left, possibly links back to this main dashboard view.
- **Search Bar:** Allows users to search (e.g., for events, DJs, venues - *exact scope needs definition*).
- **Notifications Icon:** Usually a bell icon, indicating new notifications (e.g., upcoming event reminders, verification updates, new requests). Displays a badge count for unread notifications. Tapping opens a notification list/drawer.
- **User Profile Icon/Avatar:** Displays user's picture or initial. Tapping navigates to the **Profile & Settings Screen**.

2.2. Main Navigation (Location Varies - e.g., Bottom Tab Bar (Mobile), Sidebar (Desktop))

- **Core Links:** Provides access to main sections of the app. The exact links will vary by user type, but might include:
 - Home / Dashboard
 - Events / Map
 - Create Event (DJ/Venue only)
 - Profile
 - Settings
 - QR Scanner (Listeners&DJ's)

3. Listener Landing Page View ("Home")

3.1. Primary View Options:

- **Default View:** Could be either an "Event Feed" or a "Map View". User might be

able to toggle between them.

- **Event Feed:**
 - Displays a scrollable list of upcoming or nearby events.
 - Each event shown as a card with key info: Event Name, Venue Name, DJ Name, Date/Time, Distance.
 - Tapping an event card navigates to the **Event Details Screen**.
 - Options to Sort/Filter events (e.g., by Date, Distance, Genre, Venue Type).
- **Map View:**
 - Displays a map centered on the user's approximate location (if permission granted).
 - Events shown as pins on the map.
 - Tapping a pin shows a small pop-up with basic event info and a link to the full **Event Details Screen**.
 - Map controls for zoom, pan, possibly filter visible events.

3.2. Key Actions Available:

- Browse upcoming/nearby events (via feed or map).
- Tap to view full details of a specific event.
- Use search bar.
- Access Profile & Settings.
- Check Notifications.
- Access QR Code Scanner (perhaps via a prominent button or navigation item) for event check-in.

4. DJ Landing Page View ("Dashboard")

4.1. Primary View:

- A dashboard focused on the DJ's schedule and actions.
- **Verification Status:** Prominently displayed (e.g., "Verified", "Verification Pending", "Action Required - Resubmit Info").
- **Upcoming Events:** A list or calendar view of events the DJ is booked for. Includes Venue, Date/Time. Links to **Event Details Screen**.
- **Current/Live Event:** If an event is currently active (based on time/check-in), a prominent section appears:
 - Displays Event Name/Venue.
 - Direct link/button to the **Request Management Screen**.
 - May show basic live stats (e.g., current request count).
- **Quick Stats (Optional):** Small section showing metrics like "Total Events Played", "Followers", etc.
- **Quick Actions:** Buttons/links like:

- "Create New Event" / "Add Gig"
- "View My Public Profile"

4.2. Key Actions Available:

- View upcoming schedule.
- Quickly access management screen for live events.
- Initiate creation of a new event. (DJ's/Venues)
- Access Profile & Settings (edit profile, manage verification).
- Check Notifications (e.g., new booking requests, event updates, verification status changes).
- Use search bar.

5. Venue Landing Page View ("Dashboard")

5.1. Primary View:

- A dashboard focused on events hosted at the venue.
- **Verification Status:** Prominently displayed (e.g., "Verified", "Verification Pending", "Action Required - Resubmit Info").
- **Upcoming Events:** A list or calendar view of events scheduled at the venue. Includes DJ Name, Date/Time. Links to **Event Details Screen**.
- **Current/Live Event:** If an event is currently active at the venue:
 - Displays Event Name/DJ.
 - May show basic live stats (e.g., check-in count if available, request volume).
 - Link to **Event Details Screen**.
- **Quick Stats (Optional):** Small section showing metrics like "Total Events Hosted", "Upcoming Bookings", etc.
- **Quick Actions:** Buttons/links like:
 - "Create New Event Listing" / "Schedule Event"
 - "View Venue Profile"
 - "Manage DJ Bookings" (Future feature?)

5.2. Key Actions Available:

- View upcoming event schedule for the venue.
- Monitor status of live events.
- Initiate creation of a new event listing.
- Access Profile & Settings (edit venue details, manage verification).
- Check Notifications (e.g., DJ booking requests, event updates, verification status changes).
- Use search bar.

6. Missing Details to Define

- **Search:** What specific fields/data points can be searched? (Events, DJs, Venues, Genres?) How are results presented?
- **Notifications:** Define the exact triggers for notifications for each user type. How does the notification list look/function?
- **Event Feed Logic (Listener):** Default sort order? Specific filter options needed? How is "nearby" determined (radius, location permission)?
- **Map View (Listener):** Which map provider (e.g., Google Maps, Mapbox)? How are overlapping pins handled (clustering)?
- **Dashboard Stats (DJ/Venue):** Which stats are most valuable and technically feasible to track and display?
- **Navigation Structure:** Finalize the exact items and hierarchy in the main navigation (menu/sidebar/tabs) for each user type to ensure easy access to key features.
- **Empty States:** What is displayed on feeds/dashboards when there are no upcoming events, notifications, etc.?

Note: This document describes the Main Landing Page / Dashboard flow from the user's perspective.
