

1. Venue Public Profile Page

(Content remains the same as the previous version - see context)

2. Event Creation/Editing (Venue Perspective)

2.1. Purpose:

- Enables verified venues to list events happening at their location on the platform.

2.2. Entry:

- Venue user taps a "Create Event" or similar button on their Venue Dashboard (landing_page_flow).

2.3. Flow Steps:

- **Step 1: Event Basics:**
 - Input Fields: Event Name, Date(s), Start Time, End Time.
 - Text Area: Event Description.
 - Optional Fields: Cover Charge amount, External Ticket Purchase Link.
 - Selection: Genre Tags.
 - Upload: Event Poster / Main Image.
- **Step 2: DJ Assignment:**
 - **Option A (Select Registered DJ):** Search for a DJ by name within the app's registered DJs. **Selecting a DJ sends an invitation to them.** The event listing will show "DJ Pending Approval" until the DJ accepts via their dashboard/notifications.
 - **Option B (Manual DJ Name):** Enter the DJ's name manually (no approval needed, but no link/DJ features).
 - **Option C (No DJ / Venue Playlist):** Select this option if the venue will manage the music. Enables Venue-Controlled Request Queue (see Section 4B).
- **Step 3: Request Settings (Initial Setup):**
 - Toggle: Allow Song Requests (On/Off - default?).
 - Toggle: Allow Voting on Requests (On/Off - default?). *(Note: Assigned DJ might override these settings later if they accept).*
- **Step 4: Review & Publish:**
 - Display summary of all entered details (including "DJ Pending Approval" status if applicable).
 - Button: "Publish Event" or "Save Draft". *(Note: Event might be publishable but show DJ as pending).*

2.4. Editing:

- Accessed via "Edit Event Listing" from the Venue Dashboard or the Event Details page for an event they created.
- Presents a similar flow allowing modification of details. If changing/adding a registered DJ, it triggers the invitation/approval flow.

2.5. Missing Details:

- How does the DJ invitation/assignment process work for registered DJs (Option A)? **Specify notification content for DJ (invitation) and Venue (DJ accepted/denied).** Can the Venue cancel a pending invitation?
- Can venues set default request settings that apply to all their events initially?
- What happens if an assigned DJ later changes the request settings?

3. Venue Settings

(Content remains the same as the previous version - see context)

4. Live Event Management Tools (Venue Perspective)

(Content remains the same as the previous version - see context)

Note: This document outlines specific flows and features relevant to Venue user accounts, including the DJ invitation process.
