

Detailed User Flow Map: PassTheAux

This document provides a detailed user flow map for the PassTheAux application, covering the process from login/sign-up to the end of an event. It includes user education, DJ-specific considerations, and initial ideas for the Venue experience.

I. Login/Sign-Up

A. User/DJ/Venue Selection

1. Initial Launch:

- User opens the app.
- App displays a screen with three options:
 - "I'm here to party" (General User)
 - "I'm a DJ"
 - "I'm a Host/Event Space!"
- **Design Note:** Clear, visually distinct buttons for each option. Consider subtle animations on hover/tap.
- **Venue Experience:** The "I'm a Venue" option will lead to a Venue sign-up flow, which will be detailed later.

2. "I'm here to party" (General User) Flow:

- Proceeds to the Login/Sign-Up Page.

3. "I'm a DJ" Flow:

- Proceeds to the DJ Sign-Up Flow.

B. Login/Sign-Up Page

1. Standard User Flow:

- Fields:
 - Login with Username/Email
 - First Name
 - Last Name
 - Username
 - Email
 - Create Password
 - Verify Password
- Buttons:
 - Login
 - Sign Up
 - Login with Google
 - Login with Spotify
 - Login as Guest (BETA)

- Links:
 - Forgot Password
 - Terms of Service
 - Privacy Policy
 - Error Handling (Inline):
 - Username already in use ("That username is already in use, please try another username")
 - Passwords do not match ("Your Passwords do not match, please try again")
 - **User Education:** N/A
 - **DJ Experience:** N/A
 - **Venue Experience:** N/A
2. **DJ Sign-Up Flow:**
- Fields:
 - All standard user fields
 - DJ Name (Optional)
 - Portfolio Link(s)
 - Dropdown to suggested platforms
 - Buttons:
 - Sign Up
 - Links:
 - Terms of Service
 - Privacy Policy
 - Messaging:
 - Information on required proof (MixCloud, Business Website, Social Profiles, Portfolios, etc.).
 - Explanation of the manual verification process and expected timeframe (48 hours 💡).
 - **User Education:** N/A
 - **DJ Experience:**
 - Clear communication about the verification process and its purpose.
 - Assurance that their information will be handled securely.
 - **Venue Experience:** N/A
2. **Forgot Password**
- User Initiated:
 - On the Login Page, the user clicks the "Forgot Password" link.
 - Navigation:
 - The user is taken to a "Forgot Password" screen. *
 - Forgot Password Screen:

- Prompt:
 - A clear message asking the user to enter their registered email address or username.
 - Input Field:
 - A field for the user to enter their email address or username.
 - Button:
 - * A "Submit" or "Reset Password" button.
 - Error Handling:
 - Message for invalid email address/username.
 - Password Reset Email:
 - Upon successful submission, the system sends an email to the user's registered email address.
 - The email contains:
 - A unique, secure link to a "Reset Password" page.
 - Information/instructions on what to do.
 - A timeframe within the link is valid.
 - User Interaction:
 - The user clicks on the link in the email.
 - Reset Password Page:
 - Message:
 - Clear instructions on creating a new password.
 - Fields:
 - "New Password" field.
 - "Verify New Password" field.
 - Button:
 - "Submit" or "Update Password" button.
 - Error Handling:
 - Messages for:
 - Passwords not matching.
 - Password not meeting complexity requirements.
 - Link expired/invalid.
 - Success Message:
 - Upon successful password reset:
 - Display a confirmation message: "Your password has been successfully reset."
 - Navigation: * Option to redirect the user to the Login Page.
- ### 3. Email Verification:

- After successful sign-up (for both standard users and DJs):
 - Display message: "Please check your email to verify your account."
 - Send verification email with a unique link.
- User clicks the link:
 - Display message: "Your email has been verified!"
 - Redirect to the app's main screen.
- Error Handling:
 - Link expired
 - Invalid link
- **User Education:** N/A
- **DJ Experience:** N/A
- **Venue Experience:** N/A

C. Welcome Page (First-Time Users)

1. Content:

- Welcome Message (tailored to user type):
 - General User: Introduction to the app's features and benefits.
 - DJ: Explanation of how the app helps them connect with the crowd.
- Optional Questionnaire:
 - Music tastes, favorite artists, etc.
 - Skippable option
- Overlay App Tutorial:
 - Explanation of how to navigate the app, starting with the Main Landing Page.

2. Buttons:

- "Let's Get The Party Started!" (or similar)

3. User Education:

- Welcome message explains the app's core value.
- Tutorial explains app navigation

4. DJ Experience: Welcome message explains the app's value.

5. Venue Experience: N/A

II. Main Landing Page

A. Content

1. Initial Display:

- Incomplete Questionnaire Prompt (appears for up to 5 attempts, if applicable)
- Daily Pop-up (for announcements, e.g., Request Etiquette)

2. Links/Sections:

- What's Happening Tonight

- Search
- User Profile
- DJ List
- 3. **"Now Banner"**
 - Appears when checked into an event.
 - Provides quick access to the request page.
 - May also serve as a notification center
- 4. **User Education:**
 - Request Etiquette pop-up.
- 5. **DJ Experience:** N/A
- 6. **Venue Experience:** N/A

III. What's Happening Tonight Page

A. Content

1. **Event List:**
 - List of events happening that night, with:
 - Logo, Event Title, Start Time, DJ Name
 - Clicking an event reveals:
 - Description
 - DJ/Venue profiles
 - End Times
 - Event Series info
2. **Date Banner:**
 - Horizontal scrollable date banner at the bottom.
3. **User Education:** N/A
4. **DJ Experience:**
 - Ensure DJ's events are prominently displayed and easily identifiable.
5. **Venue Experience:**
 - Ensure Venue's events are prominently displayed and easily identifiable.

IV. Event Search Page

A. Content

1. **Map:**
 - Embedded map to choose a perimeter.
 - Default radius: 15km.
 - Visual representation of selected area
2. **Filters:**
 - Toggle to show past events (within 3 months).

- Filters: DJ, Venue, and more (Genre, Date Range, Venue Type).
- 3. **Results:**
 - Live update of search results under the map.
- 4. **User Education:** N/A
- 5. **DJ Experience:**
 - Ensure DJ's events appear in relevant searches.
- 6. **Venue Experience:**
 - Ensure Venue's events appear in relevant searches.

V. Event Details Page

A. Content

1. **Event Information:**
 - Event details (description, time, etc.)
2. **Venue/DJ Information:**
 - Venue logo (clickable to Venue Profile)
 - DJ logo (clickable to DJ Profile)
3. **Location:**
 - Venue location on map
4. **Media:**
 - Venue and Event Series media content (images, videos).
5. **Request Options:**
 - "Start Making Requests (without Checking-In)" (BETA)
6. **Check-In:**
 - Check-In Button
 - "Let the DJ Know I Arrived" toggle
7. **User Education:**
 - Explanation of pre-check-in requests (if applicable).
8. **DJ Experience:**
 - Clear indication of when a user has checked in and if they want to notify the DJ.
9. **Venue Experience:**
 - Venue-specific information and media are displayed.

VI. Main Request Page (Available After Check-In)

A. Content

1. **Search:**
 - Spotify Search Bar
2. **Results:**

- Song Search Results (title, artist, album art)
- Secondary song details (last requested, release date, album)
- Visual feedback on request status (approved, denied, both)
- 3. **Request/Upvote:**
 - "Request Song" button changes to "Upvote" if the song has already been requested
- 4. **Feedback:**
 - Incoming request banner
- 5. **Request List:**
 - Sortable request list (title, artist, requester, time, votes, leaderboard position)
- 6. **Voting:**
 - Upvoting/Downvoting
- 7. **User Education:**
 - * In-app message about unavailable songs: "Uh-Oh! Looks like this song is unavailable. Try something else? *DJ Note: DJs sometimes can't play certain songs..."
 - * In-app message about request timing: "Your request has been sent to the DJ! They'll do their best to fit it in, and even approved songs may take some time to play..."
- 8. **DJ Experience:**
 - Clear display of song requests, including requester and priority (leaderboard position).
 - Ability to quickly approve or deny requests.
 - Visual cues for high-priority requests.
- 9. **Venue Experience:** N/A

VII. User Profile

A. Content

1. **Basic Information:**
 - Profile Photo (clickable to edit)
2. **Editable Information:**
 - Edit button to change:
 - Biography
 - Favorite songs, artists, albums
 - Most recent requests
3. **Activity:**
 - Top DJ/Venue (based on events attended)
4. **User Education:** N/A

5. **DJ Experience:** N/A
6. **Venue Experience:** N/A

VIII. DJ Profile

A. Viewed by Users

1. Basic Information
 - * Profile Photo
 - * DJ Logo
2. Stats
 - * Top Requested/Upvoted
3. Events
 - * Upcoming Events (horizontal scroll)
4. Connections
 - * Connected Venues
 - * Follower Count
5. Preferences
 - * Music Tastes (favorite artists, albums)
6. Links
 - * Links to portfolios (MixCloud, SoundCloud, Spotify, etc.)

B. Editable by DJ

1. **Basic Info**
 - Logo (Click to Edit)
 - Choose from Gallery
 - Upload New Logo
 - Name (Toggle Public/Private)
 - Display Real Name
 - Display DJ Name
 - DJ Name (Text Field)
 - Biography/About Me (Text Area)
 - Location (Dropdown/Searchable)
2. **Connected Socials**
 - "Add New Connection" Button
 - Dropdown List of Recommended Social Networks
3. **Music**
 - Genres (Multi-Select Dropdown)
 - Influences (Text Area)
 - Featured Mixes/Tracks (Link Input)
4. **Equipment** (Text Area)

5. **Residencies**

- Connect to Venues
- List as Location/Address

6. **Profile Preferences**

- Contact Information Visibility (Toggle)
 - Email
 - Phone Number
- Event Announcements (Toggle)
- Request Settings (Toggle)

7. **Photos/Videos** (Media Gallery)

8. **Toggleable Info**

- Name Visibility
- Contact Information Visibility
- Location Visibility
- Social Media Links Visibility
- Genres Visibility

9. User Education:

* When the user clicks on the DJ's name or logo on the Event Details page, and before they are taken to the DJ profile, add a small info snippet: "Get to know the DJ! See their upcoming events, favorite genres, and more. Keep in mind that DJs are live-mixing professionals, and while they love taking requests, they also have to consider the overall flow of the night."

IX. **Venue Profile (Initial Ideas)**

● **Venue Profile Page:**

- Venue Name
- Venue Logo
- Venue Address
- Venue Description
- Venue Photos/Videos
- Upcoming Events
- Past Events
- Resident DJs
- Genres played at venue
- Amenities (e.g., bar, food, outdoor seating)
- Contact Information
- Hours of Operation

● **Venue Account Creation:**

- Verification Process (business license, address verification)

- Ability to create and manage events
- Option to add resident DJs
- Tools to promote events to app users
- Dashboard to view event statistics (attendance, popular requests)

X. Event End

- **User Perspective:**
 - Option to rate the event and DJ.
 - Prompt to follow the DJ and/or venue.
 - Display of user's most requested songs at the event.
- **DJ Perspective:**
 - Summary of the event:
 - Number of attendees
 - Number of requests received
 - Most requested songs
 - Average song approval rating
 - Option to save the setlist.
 - Prompt to share event highlights on social media.
- **Venue Perspective:**
 - * View event attendance.
 - * See most requested songs.
 - * Option to provide feedback on DJ performance.

XI. Gaps and Areas for More Detail

- **Detailed Venue User Flow:** The Venue Experience needs a more detailed user flow, similar to the one provided for general users and DJs.
- **Notification Settings:** Detail how users and DJs can customize their notification preferences.
- **Rewards System Details:** Expand on the types of rewards, how they are earned, and how they can be redeemed.
- **Monetization Strategy:** Provide more specifics on how the app will generate revenue.
- **Platform Decision:** Document the final decision on whether the app will be mobile-only, web-only, or both.
- **UI Elements:** Include more specific details about UI elements (e.g., button styles, form field design, navigation patterns).
- **Accessibility:** Outline how the app will be made accessible to users with disabilities.
- **Data Privacy:** Provide more information on how user data will be collected,

stored, and used, ensuring compliance with privacy regulations.

- **Onboarding:** Expand on the first-time user experience, including the tutorial.
- **Error Handling:** Detail all possible error states and the corresponding user-friendly messages.
- **Security:** Describe the security measures that will be implemented to protect user data and prevent abuse.
