

End-to-End User Flow: Listener

This document outlines the typical journey and interactions for a standard user (Listener) of the app.

1. Getting Started: First Launch & Account Creation/Login

- **1.1. App Launch & Initial Choice:**

- User opens the app for the first time.
- Lands on an initial welcome screen.
- **Options Presented:**
 - Button: "Sign Up" (For new users)
 - Button: "Sign In" (For existing users)
 - Link/Button: "Continue as Guest" (During Beta)
- User taps their intended action.

- **1.2. Sign Up Flow (New User Path):**

- **(A) Entry:** User arrives after tapping "Sign Up" on the Initial Choice screen (1.1).
- **(B) User Type Selection:**
 - User is presented with the **User Type Selection Screen**.
 - User taps "Listener/User".
 - (Optional confirmation step).
- **(C) Sign Up Details:**
 - User navigates to the **Sign Up Details Screen**.
 - User enters First Name, Last Name, unique Username, Email Address, creates and confirms a Password.
 - User accepts the Terms of Service & Privacy Policy via checkbox.
 - User taps "SIGN UP".
 - *(Error Handling: Displays messages if username/email taken, passwords don't match, missing info, etc.)*
- **(D) Email Verification:**
 - On successful signup, navigates to the **Email Verification Prompt Screen**. Message instructs user to check email.
 - User leaves app, finds verification email, clicks the verification link (opens web page/deep link confirming success). User needs to return to the app and Sign In (See 1.3).

- **1.3. Sign In Flow (Existing User Path):**

- **(A) Entry:** User arrives after tapping "Sign In" on the Initial Choice screen (1.1) OR after completing email verification (1.2.D).
- **(B) Login Page:**

- Presents fields for Email/Username and Password.
- Includes "Remember Me" checkbox.
- Includes Social Login buttons (Google, Spotify).
- Includes "Forgot Password?" link (navigates to Password Reset Flow - defined separately).
- **(C) Email/Password Login:**
 - User enters Email/Username and Password.
 - Optionally checks "Remember Me".
 - User taps "LOG IN".
 - *(Error Handling: Displays messages for invalid credentials, unverified email.)*
 - On success, user is authenticated. Proceeds to First-Time Setup (Section 2) if it's their very first login after signup, otherwise proceeds directly to Main App Experience (Section 3).
- **(D) Social Login:**
 - User taps "Login with Google" or "Login with Spotify".
 - User authenticates via the selected provider's interface.
 - On success, user is authenticated and returned to the app. Proceeds to First-Time Setup (Section 2) if it's their very first login, otherwise proceeds directly to Main App Experience (Section 3).
- **1.4. Guest Flow (Beta):**
 - User taps "Continue as Guest" on the Initial Choice screen (1.1).
 - User enters the main app experience with limited functionality. *(Remainder of flow assumes a registered, logged-in user).*

2. First-Time Setup (Immediately after first successful authentication)

- **2.1. Initial Account Details (Listener):**
 - *(Previously 2.2)* User sees the optional setup screen (since User Type was selected during signup).
 - User can optionally upload a Profile Picture, set a Display Name, provide Location, select Favorite Genres.
 - User taps "Continue" or "Skip for Now".
- **2.2. First Time Welcome / Onboarding:**
 - *(Previously 2.3)* User sees the **First Time Welcome Screen**.
 - Reads welcome message and brief intro.
 - User taps "Start Exploring" (optionally can tap "Quick Tutorial").

3. Main App Experience: Discovering & Interacting with Events

- **3.1. Landing Page ("Home"):**

- User arrives at the main app interface. Default view is likely the **Event Feed** or **Map View**.
- **Common Elements:** Sees Header (Search Bar, Notifications Icon, Profile Icon) and Main Navigation (e.g., Home, Tonight, Map, Search, Profile, QR Scanner?).
- **Event Feed View:** User scrolls through cards of nearby/upcoming events (Event Name, Venue, DJ, Time, Distance). Taps card -> Event Details. Uses Sort/Filter.
- **Map View:** User interacts with map pins for nearby/upcoming events. Taps pin -> Event Details.
- **3.2. "Tonight" Page:**
 - User navigates via main nav.
 - Sees events filtered for the current date.
 - Can toggle List/Map view.
 - Taps event -> Event Details.
- **3.3. Event Search:**
 - User uses Search Bar in header.
 - Enters query.
 - Views Search Results Page (Tabs: Events, DJs, Venues).
 - Filters/sorts results.
 - Taps Event -> Event Details.
 - Taps DJ -> DJ Public Profile (Read-only view).
 - Taps Venue -> Venue Public Profile (Read-only view).
- **3.4. Event Details Page:**
 - User arrives from Feed, Map, Tonight, or Search.
 - Views all event info (Title, Image, Time, Venue, DJ, Desc, Genre, Cost).
 - Sees Venue details (Name links to Venue Profile, Address links to map app).
 - Sees DJ details (Name links to DJ Profile).
 - Sees "Add to Calendar" and "Share Event" options.
 - **Check-in:** Sees "Check-In" button (enabled if live & geofenced). Taps -> Initiates QR Scan Flow. Status updates to "Checked In".
 - **Request Song:** Sees "Request Song" button (enabled if DJ accepts requests - *check-in NOT required for now*). Taps -> Navigates to Song Request Screen.
 - **Live Request List/Voting:** Views list (if public), uses vote buttons (if enabled).
- **3.5. QR Code Scan Flow (Check-in):**
 - Initiated from Event Details "Check-In" button.
 - App requests Camera permission (if not granted).
 - Camera view opens with scanning overlay.
 - User points camera at Venue's QR code.
 - **Success:** Scan successful, app verifies code validity & geofence.

Confirmation message ("Checked In Successfully!"). User returns to Event Details page (status updated).

- **Failure:** Error message (e.g., "Invalid QR Code", "Check-in failed - not at venue?", "Camera permission needed").

- **3.6. Song Request Screen:**

- User arrives from Event Details "Request Song" button.
- Interface to search Spotify (Input field, search button, results list).
- User selects a song.
- Option to add a short comment.
- Submit Request button.
- Confirmation message ("Request Sent!").
- Navigates back to Event Details page.

- **3.7. Profile & Settings Screen:**

- User arrives via Profile Icon in header.
- View/Edit Profile Pic, Display Name, Location, Favorite Genres.
- Manage Account Settings (Change Password, Email?).
- Notification Preferences.
- View Linked Accounts (Spotify/Google).
- Logout button.
- Links to Help/Support, ToS, Privacy Policy.

- **3.8. Notifications:**

- User receives notifications (e.g., event reminders, potentially request status updates if implemented).
- Accesses list via Bell Icon in header.

4. Ending the Session

- **4.1. Logout:**

- User navigates to Profile & Settings.
- User taps the "Logout" button.
- User is returned to the Login Page.

Note: This document outlines the end-to-end flow from the Listener's perspective, starting with an initial choice between Sign Up and Sign In.
