

End-to-End User Flow: DJ

This document outlines the typical journey and interactions for a DJ user of the app.

1. Getting Started: First Launch & Account Creation/Login

- **1.1. App Launch & Initial Choice:**
 - User opens the app for the first time.
 - Lands on an initial welcome screen with options: "Sign Up", "Sign In", "Continue as Guest".
 - User taps "Sign Up" (New User) or "Sign In" (Existing User).
- **1.2. Sign Up Flow (New DJ Path):**
 - **(A) Entry:** User arrives after tapping "Sign Up".
 - **(B) User Type Selection:** User selects "DJ". (Optional confirmation).
 - **(C) Sign Up Details:** User enters First Name, Last Name, unique Username, Email Address, creates/confirm Password, agrees to ToS/PP. Taps "SIGN UP". (*Error handling for duplicates, etc.*)
 - **(D) Email Verification:** Navigates to Prompt. User verifies via email link, then returns to app to Sign In.
- **1.3. Sign In Flow (Existing DJ Path):**
 - **(A) Entry:** User arrives after tapping "Sign In" or returning after verification.
 - **(B) Login Page:** Enters Email/Password or uses Social Login (Google/Spotify). Optionally uses "Remember Me". Taps "LOG IN". Includes "Forgot Password?" link. (*Error handling for invalid credentials, etc.*)
 - **(C) Success:** User is authenticated. Proceeds to First-Time Setup (Section 2) if first login, otherwise proceeds directly to DJ Dashboard (Section 3).

2. First-Time Setup (Immediately after first successful authentication as DJ)

- **2.1. Initial Account Details (DJ):**
 - User sees the DJ setup screen, emphasizing mandatory verification.
 - User uploads Profile Picture (Required).
 - User enters DJ Name (Public, Required), Real Name (Verification, Required), Location (City/Region, Required).
 - User optionally enters Brief Bio and Music Links (Mixcloud, SoundCloud, etc.). Min. 1 Required.
 - **Verification:** User selects method and provides proof (link or document upload) as required by the platform.
 - User taps "Submit for Verification" (or potentially "Save & Verify Later").
- **2.2. First Time Welcome / Onboarding:**
 - User sees the **First Time Welcome Screen** tailored for DJs.

- Reads welcome message and brief intro to DJ features.
- User taps "Go to Dashboard" (optionally can tap "Quick Tutorial").

3. Main App Experience (DJ)

- **3.1. Landing Page (DJ Dashboard):**

- User arrives at their main DJ Dashboard.
- **Common Elements:** Sees Header (Search, Notifications, Profile), Main Navigation (e.g., Dashboard, My Events, Create Event, Profile).
- **Dashboard View:**
 - **Verification Status:** Clearly visible (Pending, Verified, Action Required). (Pinned Banner under header until verified.)
 - **Pending Invitations/Approvals:** Section showing incoming event invitations from Venues (with Accept/Deny buttons) and outgoing events awaiting Venue approval.
 - **Upcoming Events:** List/calendar of confirmed events DJ is playing. Tapping -> Event Details.
 - **Current/Live Event:** Prominent section if an event is live. Tapping -> Request Management Screen or Event Details.
 - **Quick Actions:** Buttons like "Create New Event", "View My Public Profile". (Note: Public Profile displays DJ Name, Pic, Location, Bio, Links, Upcoming Public Events, and potentially public stats like 'Most Commonly Seen At [Venue Name]').

- **3.2. Event Search:**

- User uses Search Bar in header.
- Enters query (event, DJ, venue).
- Views **Search Results Page** (Events, DJs, Venues tabs). Filters/sorts results.
- Taps Event -> Event Details Page.
- Taps DJ -> **DJ Public Profile Page** (View own or others - includes public stats like 'Most Common Venue').
- Taps Venue -> Venue Public Profile Page.

- **3.3. Event Creation Flow (DJ Perspective):**

- User taps "Create New Event" from Dashboard or main navigation.
- **Step 1 (Basics):** Enters Event Name, Date/Time, Description, Cover/Ticket info, Genre, Poster.
- **Step 2 (Venue Assignment):** Selects a registered Venue (sends invitation requiring Venue approval) or enters Venue name manually.
- **Step 3 (Request Settings):** Sets initial "Allow Requests" & "Allow Voting" toggles for the event.
- **Step 4 (Review & Publish):** Confirms details (shows "Venue Approval

Pending" if applicable). Publishes event.

- **3.4. Event Details Page (Viewing Own Event):**
 - User arrives from Dashboard, Search, etc.
 - Views common event info (Title, Image, Time, Desc, Genre, Cost).
 - Views Venue details (shows "Venue Approval Pending" or confirmed/linked Venue Profile).
 - **DJ Actions:** Sees "Edit Event" button. If event is live, sees "Manage Requests" button, "View Check-ins" button, and the "Accepting Requests: On/Off" toggle.
- **3.5. Event Details Page (Viewing Others' Events):**
 - Views common event info. Sees confirmed/linked DJ and Venue profiles. Limited actions available.
- **3.6. Request Management Screen (During Live Event):**
 - Accessed via Dashboard or Event Details for a live event.
 - Sees Live Event context (Name, Venue).
 - Manages **Main Queue** (Default sort: Leaderboard/Votes): Approves/Denies/Marks Unavailable requests using buttons or swipes. Denied/Unavailable songs are removed and blocked from re-request for the event.
 - Optionally views/manages **Secondary (Pre-Check-in) Queue**: Approves/Denies requests ahead of time (notifies requester).
 - Receives notification when a pre-requester checks in; their approved/new requests move to Main Queue (duplicates upvote existing). Sees VIP highlight on these requests.
 - Uses master "Accepting Requests" toggle.
 - Sees **Dynamic Notification Bar** for new requests/vote milestones.
 - Uses Filters/Sorting (Leaderboard, Newest, Oldest, Approved, Played, Denied).
- **3.7. Profile & Settings Screen:**
 - Accessed via Profile Icon.
 - **View/Edit DJ Profile:** Manage Pic, DJ Name, Real Name, Location, Bio, Links.
 - **Manage Verification Status:** View status, resubmit info if needed.
 - **Manage Account Settings:** Change Password, Email.
 - **Notification Preferences:** Control notification triggers.
 - **View Linked Accounts:** Google/Spotify.
 - **View Performance Stats (Private):**
 - Access detailed statistics derived from event history.
 - Examples: Most requests received in a single event, Highest request approval percentage, Most denied song titles (overall/per event), Most

active users during an event (if tracked), Most commonly seen at [Venue].

- Includes access to **Past Events / Request History** (which provides Spotify links for requested songs).
- **Logout button.**
- **Links:** Help/Support, ToS, Privacy Policy.
- **3.8. Notifications:**
 - User sees badge on Bell Icon. Taps to view list.
 - Receives notifications for: Venue Invitations, Venue Accept/Deny confirmations, Verification Status updates, Pre-requester Check-ins, Event Reminders, Messages from Venue (during live event).

4. Post-Event Experience

- **4.1. Requests Closed Notification:** DJ receives notification when requests close for an event (manually toggled or event end time).
- **4.2. Request Report:** Notification links to a summary report for the completed event.
- **4.3. History Access:** DJ can browse past events and view associated request data/reports via the "History" section in Profile & Settings. Including Spotify Links to all requests to quickly find what was missing.

5. Ending the Session

- **5.1. Logout:**
 - User navigates to Profile & Settings.
 - User taps the "Logout" button.
 - User is returned to the Login Page.

Note: This document outlines the end-to-end flow from the DJ's perspective.
