

End-to-End User Flow: Venue

This document outlines the typical journey and interactions for a Venue administrator/user of the app.

1. Getting Started: First Launch & Account Creation/Login

- **1.1. App Launch & Initial Choice:**
 - User opens the app for the first time.
 - Lands on an initial welcome screen with options: "Sign Up", "Sign In", "Continue as Guest".
 - User taps "Sign Up" (New User) or "Sign In" (Existing User).
- **1.2. Sign Up Flow (New Venue Path):**
 - **(A) Entry:** User arrives after tapping "Sign Up".
 - **(B) User Type Selection:** User selects **"Venue"**. (Optional confirmation).
 - **(C) Sign Up Details:** User (representing the venue) enters First Name, Last Name (of contact person), unique Username, Email Address, creates/confirms Password, agrees to ToS/PP. Taps "SIGN UP". (*Error handling for duplicates, etc.*)
 - **(D) Email Verification:** Navigates to Prompt. User verifies via email link, then returns to app to Sign In.
- **1.3. Sign In Flow (Existing Venue Path):**
 - **(A) Entry:** User arrives after tapping "Sign In" or returning after verification.
 - **(B) Login Page:** Enters Email/Password or uses Social Login. Optionally uses "Remember Me". Taps "LOG IN". Includes "Forgot Password?" link. (*Error handling for invalid credentials, etc.*)
 - **(C) Success:** User is authenticated. Proceeds to First-Time Setup (Section 2) if first login, otherwise proceeds directly to Venue Dashboard (Section 3).

2. First-Time Setup (Immediately after first successful authentication as Venue)

- **2.1. Initial Account Details (Venue):**
 - User sees the Venue setup screen, emphasizing mandatory verification.
 - User enters Venue Name (Required), Full Address (Required), Contact Person Name (Required), Contact Email/Phone (Required).
 - User selects Venue Type (e.g., Club, Bar, Restaurant - *is this required?*).
 - User optionally enters Website and Social Media Links.
 - **Verification:** User selects method and provides proof (Business License, Utility Bill, etc.) as required by the platform.
 - User taps "Submit for Verification" (or potentially "Save & Verify Later").
- **2.2. First Time Welcome / Onboarding:**

- User sees the **First Time Welcome Screen** tailored for Venues.
- Reads welcome message and brief intro to Venue features.
- User taps "Go to Dashboard" (optionally can tap "Quick Tutorial").

3. Main App Experience (Venue)

- **3.1. Landing Page (Venue Dashboard):**

- User arrives at their main Venue Dashboard.
- **Common Elements:** Sees Header (Search, Notifications, Profile), Main Navigation (e.g., Dashboard, Events, Create Event, Profile).
- **Dashboard View:**
 - **Verification Status:** Clearly visible (Pending, Verified, Action Required).
 - **Pending Invitations/Approvals:** Section showing incoming event invitations from DJs (with Accept/Deny buttons) and outgoing events awaiting DJ approval.
 - **Upcoming Events:** List/calendar of confirmed events scheduled at the venue. Tapping -> Event Details.
 - **Current/Live Event:** Prominent section if an event is live. Tapping -> Event Details or Live Management Tools.
 - **Quick Stats (Optional):** e.g., Total Events Hosted This Month/All-Time, Upcoming Bookings Count. (*Metrics Opportunity: Consider tracking All-Time Unique DJs Hosted, Average Check-ins per Event Type*).
 - **Quick Actions:** Buttons like "Create New Event Listing", "View Venue Profile".

- **3.2. Event Search:**

- User uses Search Bar in header.
- Enters query (event, DJ, venue).
- Views **Search Results Page** (Events, DJs, Venues tabs). Filters/sorts results.
- Taps Event -> Event Details Page.
- Taps DJ -> DJ Public Profile Page.
- Taps Venue -> Venue Public Profile Page (View own or others).

- **3.3. Event Creation Flow (Venue Perspective):**

- User taps "Create New Event Listing" from Dashboard or main navigation.
- **Step 1 (Basics):** Enters Event Name, Date/Time, Description, Cover/Ticket info, Genre, Poster.
- **Step 2 (DJ Assignment):** Selects a registered DJ (sends invitation requiring DJ approval), enters DJ name manually, or selects "No DJ / Venue Playlist" (enables Venue Queue Control).
- **Step 3 (Request Settings):** Sets initial "Allow Requests" & "Allow Voting" toggles.

- **Step 4 (Review & Publish):** Confirms details (shows "DJ Approval Pending" if applicable). Publishes event.
- **3.4. Event Details Page (Viewing Event at Own Venue):**
 - User arrives from Dashboard, Search, etc.
 - Views common event info (Title, Image, Time, Desc, Genre, Cost).
 - Views DJ details (shows "DJ Approval Pending" or confirmed/linked DJ Profile).
 - **Venue Actions:** Sees "Edit Event Listing" button. If event is live, sees link/button to access **Live Event Management Tools** (Section 3.6). Sees live stats (Check-ins, Request volume?).
- **3.5. Event Details Page (Viewing Others' Events):**
 - Views common event info. Sees confirmed/linked DJ and Venue profiles. Limited actions available.
- **3.6. Live Event Management Tools (Venue - During Live Event):**
 - Accessed from Dashboard or Event Details for a live event.
 - **(A) Messaging DJ:** Interface to send direct or scheduled messages (Last Call, Drink Specials, etc.) to the assigned DJ (requires dismissal by DJ).
 - **(B) Venue-Controlled Request Queue:** *If* event has "No DJ", Venue sees interface to Approve/Deny/Mark Unavailable incoming listener requests. Controls "Accepting Requests" toggle.
 - **(C) View Attendance/Stats:** Sees live check-in count, possibly request volume. *(Metrics Opportunity: Track peak check-in times, request patterns during the event?)*
 - **(D) Broadcast Venue Announcement: (New Section)**
 - **Interface:** Button "Send Announcement". Opens composer.
 - **Composer:** Text input field (with character limit?), Audience Selector (e.g., "All Checked-in Users" - *needs definition*), "Send" button.
 - **Functionality:** Venue types message, selects audience, sends. Sends push notifications to targeted users. Potentially displays as a temporary banner within the app for users at the event.
 - **Use Cases:** Venue-wide specials, general announcements, safety info.
- **3.7. Profile & Settings Screen:**
 - Accessed via Profile Icon.
 - **Edit Venue Profile:** Manage Name, Address, Contact Info, Description, Operating Hours, Website/Social Links.
 - **Manage Photos:** Upload/delete/reorder venue photos.
 - **Manage Verification Status:** View status, resubmit info if needed.
 - **Geofence Management:** View current geofence, potentially request adjustments.

- **Notification Preferences:** Control notification triggers.
- **(Future) Staff Access:** Manage staff accounts linked to the venue.
- **View Performance Stats (Private):**
 - Access detailed statistics derived from event history. *(Metrics Opportunity: Define key Venue stats - e.g., All-Time Events Hosted, Average Check-ins (overall/by genre/by DJ), Peak Traffic Hours/Days (All-Time), Most Frequent DJs, Listener Demographics (if available/aggregated)).*
 - Includes access to **Past Events / History**.
 - *(Metrics Opportunity: Could settings related to the data shown on the TV Leaderboard Screen be managed here?)*
- **Logout button.**
- **Links:** Help/Support, ToS, Privacy Policy.
- **3.8. Notifications:**
 - User sees badge on Bell Icon. Taps to view list.
 - Receives notifications for: DJ Invitations, DJ Accept/Deny confirmations, Verification Status updates, Event Reminders.

4. Post-Event Experience

- **4.1. History Access:** Venue can browse past events hosted at their location via the "History" section in Profile & Settings. Can access associated data (check-in counts, potentially request summaries if relevant/shared). *(Metrics Opportunity: Generate venue-specific post-event reports summarizing key stats?)*

5. Ending the Session

- **5.1. Logout:**
 - User navigates to Profile & Settings.
 - User taps the "Logout" button.
 - User is returned to the Login Page.

6. Conceptual Notes & Related Features

- **Feature Concept: TV Leaderboard Screen:** A separate display output (e.g., web page view) is envisioned for TVs within the venue. This screen would dynamically display content like the live song request leaderboard, event information, venue announcements (potentially those sent via Section 3.6.D), and metrics. It could also potentially showcase checked-in users who have opted-in to sharing their presence. *The specific design, content rotation, and data feeds for this screen require separate, detailed definition.*
- **Related Feature: User Presence Opt-in:** To enable showcasing users on the TV Leaderboard, a setting needs to be added to the **Listener's** Profile & Settings

screen (listener_user_flow) allowing them to explicitly opt-in to making their presence known when checked into an event.

Note: This document outlines the end-to-end flow from the Venue's perspective, including broadcast announcements.
